

VARDHAMAN KALLOLI

MACHINE LEARNING DEVELOPER

PROFILE

I am a 17-year-old computer freak and an enthusiastic AI/ML developer. I'm a super curious guy. I spend a lot of time coding and developing AI and Automation software, but there's also a lot more to it. I desire to become an entrepreneur with my hard work and skills in coding and business. Programming is a true passion of mine and that passion continually grows with every meaningful tech-related conversation I have, with every moment of clarity as I finally figure out a nagging issue on a project, and with every new concept, language, or framework I delve into. I enjoy the collaborative nature of working on a team-building product. The feedback, discussion, and review in this environment bring out the best in each individual and is a crucial component of my own personal development.

EDUCATION

KLE Society's Smt. C.B.Ranamode School, Athani

June, 2010 – March, 2021

Graduated from high school(10th) in 1st rank with 95% of marks in the class of 90.

ICS Mahesh PU College Dharwad

June, 2021 – Currently studying here

Pursuing my secondary high school.

WORK EXPERIENCE

Brainlox Lead Machine Learning Developer

June, 2021 – Currently working here (Internship).

Designed, implemented, and evaluated new models and rapid software prototypes to solve problems in machine learning and systems engineering. Researched, designed and implemented machine learning applications to solve business problems affecting the business. Implemented and evaluated artificial intelligence and machine learning algorithms and neural networks for diverse industries. Composed production-grade code to convert machine learning models into services and pipelines to be consumed at web scale.

SKILLS
